The next two pages display the follow-up results of a data driven decision to change the length of student teaching from ten weeks to twelve weeks. **The mean score in every student teaching category was higher for 12-week student teaching placements.** The data indicated that the change to 12-week placements did not negatively impacted student teacher final evaluation ratings from cooperating teachers. Page 1 shows the total for seven years of data with the five-point scale. Page 2 displays the data for the 12-week evaluations.

2004-2011 Data

The mean scores were established by using the cooperating teachers' final evaluation ratings of student teachers. Cooperating teachers rated student teachers' performance in each area using a 5-point scale, with a score of 5 being the best. (5-target, 3-acceptable, and 1-unacceptable)

2009-2011 Data

The mean scores were established by using the cooperating teachers' final evaluation ratings of student teachers. Cooperating teachers rated student teachers' performance in each area using a 5-point scale, with a score of 5 being the best. (5-target, 3-acceptable, and 1-unacceptable)
